

**ARMOR
ANDRÉ**

Capabilities Overview

Armor André is a leading manufacturer of high volume washers and stampings for the fastener industry throughout the U.S. and Canada. As a leader in the unique technologies of metal stamping, we are growing to meet new market demands.

Our 70,000 SF facility is located in the center of the industrial Midwest, Elkhart, Indiana. From this location, we have timely and economical access to suppliers and customers. We produce washers and other high quality metal stampings utilizing fully automated high speed press lines which are capable of producing multiple parts per second. At Armor André, our goal is to produce the best product at the best price meeting customers' exacting specifications and delivery requirements.

We are seasoned experts in raw materials, machining, VE/VA, S/M integration, stamping, CE, QE, ME, and PE.

Capabilities

Washers

We specialize in high volume specialty washers utilizing SPC throughout our manufacturing process to provide the highest quality standards for all products. We can implement a complete quality program to meet automotive specifications, and accommodate all automotive quality requirements with documentation. Plus, our system allows for the traceability of materials throughout the manufacturing process. Every box of parts can be traced back throughout all processes to the raw materials. Complete material, heat treat, and plating certificates are also available.

Stamping

Automated press lines with state-of-the-art die protection monitors and custom computer systems allow Armor André to employ unique technologies of metal stamping to meet your diverse stamping and engineering specifications efficiently and economically.

Die Design and Build

A state-of-the-art tool room has allowed Armor André to take its in-house tool building capabilities to the next level and emerge as a solid supplier in the metal stamped parts market. With Armor André, you gain a competitive advantage resulting in shorter development and build times.

Coil Processing

It starts with in-house coil processing. Armor André's steel unit provides coil slitting for fast delivery at competitive pricing. Steel procurement, combined with our in-house slitting lines, dramatically reduce the time to produce your production ready parts. Steel is inventoried and then slit to final widths once die dimensions are determined.

Managed Inventory

Customized to meet your needs, Armor André helps you beat industry standards of three to four annual turns. Our systems approach is custom-designed and delivered by our professional staff. We use automotive concepts of SPC and LEAN as foundations in our system design to managed inventory.
